

KIMBERLY ANN ADJEI

Accra, Ghana | +233 (0) 533408792 | adjeikimberly1@gmail.com | [LinkedIn](#) | [GitHub](#) | [Kaggle](#)

PROFESSIONAL SUMMARY

Results-driven Data Analyst with hands-on experience in Python, SQL, machine learning, and AI workflow automation. Skilled in end-to-end data analysis, EDA, dashboard development (Power BI, Tableau), and LLM evaluation. Background in logistics and engineering provides structured thinking, precision, and operational discipline. Actively transitioning into AI/ML engineering and data science roles with demonstrated ability to build AI-powered tools, annotate complex workflows, and deliver actionable insights from ambiguous data.

TECHNICAL SKILLS

Programming & Tools: Python, SQL, Jupyter Notebook, Git & Linux (CLI).

Libraries & Frameworks: Pandas, NumPy, Scikit-learn, Matplotlib & Seaborn.

Data Visualization: Power BI, Tableau & Excel.

AI & ML: LLM APIs, prompt engineering, AI output evaluation, workflow annotation and model fine-tuning data prep.

Data Skills: Data cleaning, preprocessing, exploratory data analysis (EDA), feature engineering and hypothesis testing.

Soft Skills: Analytical thinking, technical documentation, stakeholder communication and attention to detail.

WORK EXPERIENCE

Data Analyst (Bootcamp Graduate) | Generation Ghana, Accra, Ghana

Aug – Nov 2025

- Executed end-to-end data analysis workflows including requirement gathering, data wrangling, EDA, and insight delivery using Python, Pandas, and SQL.
- Built interactive dashboards in Power BI and Tableau translating complex datasets into actionable business insights for non-technical stakeholders.
- Leveraged LLM APIs to augment analytical outputs, improving accuracy and context alignment across multiple data projects.
- Managed multiple concurrent analytical tasks while maintaining high quality standards and meeting project deadlines.
- Collaborated with peers and instructors to refine hypotheses and validate analytical findings through structured peer reviews.

Logistics Assistant | Yinson Production West Africa Limited, Ghana

Nov 2022 – Oct 2024

- Managed end-to-end shipment tracking, documentation, and inventory workflows using IFS ERP system, reducing documentation errors by ensuring 100% traceability.
- Coordinated multi-stakeholder logistics operations across offshore and onshore environments, ensuring timely delivery and compliance with international standards.
- Maintained structured, audit-ready documentation and validation processes supporting cross-functional teams under tight operational timelines.
- Supported data integrity efforts by standardizing records management practices across logistics databases and reporting tools.

Laboratory Intern | KNUST Process Development Laboratory, Ghana

Nov – Dec 2021

- Conducted experimental data collection, analysis, and documentation for multi-step research workflows in a controlled laboratory environment.
- Delivered structured reports with findings, insights, and reproducibility-focused recommendations to research supervisors.

PROJECTS

AI Task Assistant | Python, LLM APIs, Workflow Automation

- Designed and deployed a multi-step AI task assistant using Python and LLM APIs to automate structured query handling and contextual response generation.
- Debugged API integration errors, refined prompt structures, and optimized workflow reliability, reducing failure rates through iterative testing.
- Documented step-by-step reasoning and decision logic for each workflow stage, enabling reproducibility and evaluation by third parties.
- Simulated real-world AI agent behavior by integrating automation, reasoning chains, and tool usage into a single pipeline.

LLM Evaluation & Workflow Annotation | AI Quality Assurance

- Created structured datasets for AI agent training, including multi-step reasoning tasks, instruction clarification, and edge-case coverage.
- Evaluated AI-generated outputs for correctness, logical consistency, and adherence to specified guidelines across diverse task types.
- Transformed ambiguous or underspecified instructions into clear, executable workflow steps with documented assumptions.

Coffee Shop Sales Dashboard | Power BI

- Developed an interactive Power BI dashboard analyzing sales trends, peak hours, and promotional impact, enabling data-driven marketing decisions.
- Delivered clear data storytelling through visualizations that surfaced actionable insights for non-technical stakeholders.

Factory Telemetry Analysis | Tableau, Deloitte Job Simulation

- Analyzed machine telemetry data to identify failure patterns, anomalies, and operational inefficiencies in a simulated manufacturing environment.
- Built Tableau dashboards to support predictive maintenance recommendations and improve equipment uptime.

EDUCATION & CERTIFICATIONS

Data Analysis Program - Generation Ghana	<i>Nov 2025</i>
Data Analytics Job Simulation - Deloitte Australia (Forage)	<i>Oct 2025</i>
BSc. Petrochemical Engineering - Kwame Nkrumah University of Science & Technology, Ghana	<i>Sep 2022</i>

KEY ACCOMPLISHMENTS

- Built and deployed a fully functional AI-powered workflow assistant demonstrating multi-step reasoning and task automation using real LLM APIs.
- Successfully transitioned from logistics operations into data analytics and AI within 12 months through self-directed upskilling and a structured bootcamp.
- Consistently delivered accurate, well-documented analysis across engineering research, logistics operations, and data projects.
